

## **ELECTION**

The Examiner asserts that the application contains patentably distinct inventions identified as follows.

- I: Claims 1-7 and 33.
- II: Claims 8-22, 34-37 and 40-42.
- III: Claims 23-29, 34 and 39.
- IV: Claims 30-33, 34 and 38.

In response to the election requirement, the Applicant elects **Invention III** – **Claims 23 – 29, 34 and 39** for prosecution, and requests that **Claim 37** be further included in this distinct invention.

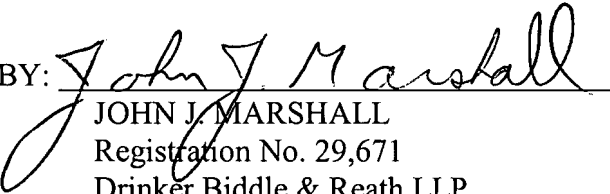

The invention covered by these claims are the combination of an anisotropic wound packing, such as the cylindrical gauze roll of Figure 3, in a wound dressing system for applying suction to the wound as exemplified in Figures 2, 4, 6, 7 or 9; and the method of using the anisotropic wound packing in a wound dressing to control the direction of contraction of the wound when suction is applied to the dressing.
